

# Spinocerebellar Ataxia Research Volunteers Needed

## Home-Based Assessments of Movement, Cognition, Speech & Mood

### What is the research about?

- Testing a home-based assessment for individuals with a spinocerebellar ataxia, including:
  - Movement
  - Thinking and memory
  - Speech
  - Mood

### What does participation involve?

- Assessments undertaken in your own home:
  - Annual teleconference- and computer-based assessments (2 - 2.5 hours over two sessions)
  - Monthly computer-based assessments (25 minutes per month)

### You may be eligible to participate if you:

- Are aged 18 years or older
- Have a positive gene test for a spinocerebellar ataxia (with or without symptoms)
- Have no history of other neurological illnesses
- Have home access to a computer/laptop and the internet
